DETAILED ACTION

1. Amendment filed on 3/14/05 has been received.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 and 11-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 99/54157 in view of Szukay et al (U. S. Patent no. 4,818,166).

WO 99/54157 discloses a crimped collar. See figure 7 and pages 10 and 11 of the specification.

WO 99/54157 does not disclose crimping to form crimped areas at opposed locations.

Szukay et al teaches attaching a ring to a shaft by crimping at opposite locations. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the collar crimped at 4 locations as taught by Szukay et al in the device of WO 99/54157 in order to secure the ring to the shaft in a more robust manner than with one crimp location.

Regarding claim 2, 4, 5, 9-11, and 20-22, WO 99/54157 is relied upon as above. WO 99/54157 does not disclose various design details claimed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the various

design details claimed as such is merely a design choice. These details have a insignificant impact on the functioning of the device.

Response to Arguments

4. Applicant's arguments with respect to claims 1-9 and 11-22 have been considered but are moot in view of the new ground(s) of rejection.
